that call the Fairview "home".*

All other guests, rates available from Ksh 15,700 (approx \$180**)*

Fairview
the country hotel in town

Bishops Road, Upperhill PO Box 40842 - 00100 Nairobi, Kenya. Tel: (+254-20) 2881000 Fax: (+254-20) 2721320
Email: book@fairviewkenya.com www.fairviewkenya.com

**Rate is for a single, double rates are higher. The Fairview offers 4 categories of single rooms. **The approximate dollar rate will fluctuate daily.*

Rhino Ark Objectives

Rhino Ark seeks solutions to the challenges facing the mountain forest ecosystems of Kenya, also known as the water towers. More specifically, Rhino Ark aims to:

- Conserve such ecologically precious indigenous forests and their provision of vital environmental services;
- Create a sustainable and harmonious environment that enables people and wildlife, including all flora and fauna, to coexist;
- Create and provide sustainable programmes for forest edge communities based on payments for ecosystem services. Such programmes and projects will be tailored to create income generation for the communities that support the conservation of natural resources.

Rhino Ark is committed to:

- Mobilize stakeholders nationwide and internationally for initiatives to protect and conserve the habitat and promote managed use of forest products for the benefit of present and future generations;
- Raise funds and other forms of support to develop sound management processes over entire eco-systems;
- Create frameworks where wider society and forest edge communities become involved in the management processes through public-private partnerships;
- Build mechanisms and management structures to prevent illegal exploitation of the forest habitat wherever it is threatened.

In so doing all stakeholders will benefit and the flora and fauna, particularly endangered species, will be better secured.

Our conservation work is anchored in three key values:

- Protecting ecosystem integrity;
- Ensuring full involvement of and participation by local communities;
- Forming effective partnerships.

Act now!...

help us to continue our work

Executive Director's view

The Rhino Charge 2013 was a major success in all respects. This year's fundraise surpassed the one million dollar mark. More than ever, the Charge received massive in kind support from an army of volunteers and vital logistics support from many corporate organizations. It was also a great success from a competition standpoint. With a compact course, the Charge gave competitors the opportunity to focus more on distance than time, demanding greater skill from drivers, navigators and runners.

This year's event has been a greener one, achieving new benchmarks in waste management. It was organized by a Committee with a wealth of experience and innovation, led by the new Clerk of the Course, David Lowe, who took over the legendary 'map box' in 2012 from his predecessor Anton Levitan.

With the contributions of the Chargers and their many supporters, Rhino Ark has been able to continue the expansion of its programmes and to secure additional support from the Government, including a second contribution of Ksh. 100 million towards the fencing of Mt. Kenya and Mau Eburu ecosystems.

With a clear focus on conservation of Kenya's mountain forest ecosystems, also known as the water towers, Rhino Ark identifies, develops and implements management tools to assist Kenya Wildlife Service, Kenya Forest Service and the local communities to sustainably manage these critical natural assets.

Electric fences were initially the primary management tool implemented by Rhino Ark. Although fences remain at the core of Rhino Ark's conservation work, new tools have been added to our conservation portfolio, and existing tools better leveraged. These tools address issues related to environmental education, forest and catchment rehabilitation, wildlife corridors, ecological monitoring, fence maintenance, gate management, patrolling and law enforcement. The tools are complementary to electric fences. They assist in achieving the objectives of the fences: allowing humans to live in harmony with wildlife and habitat. They also support the wider national efforts to address the enormous wildlife poaching challenge. They could be considered as the software that make our fences - the hardware - function effectively.

In carrying out its conservation work, Rhino Ark's approach is more than ever based on partnerships. Rhino Ark not only provides a platform that enables the private sector to support or engage with the Government in environmental conservation, but also facilitates partnerships among public sector institutions. This approach has been instrumental in reducing overhead costs, avoiding duplication, increasing accountability and transparency and ensuring quality control.

RHINO ROUGE'S RECOLLECTIONS OF A GREAT CHARGE

Finally - we achieved a goal we had been dreaming of. But not the way we had planned it. We are quite strict about saying we stick to our plan but inevitably on the day you have to work the plan.

We had actually decided to modify our car for the first time in nine years by adding power steering. But as often happens, on arrival in camp with a car over heating we realized something was seriously wrong. Our hearts sank – not again !

So we decided to ditch the fancy power steering at the 11th hour and stick with the rib breaking, finger smashing elbow crunching steering. And so we entered the 2013 Charge as an unmodified all ladies car.

We are proud to be part of another million dollar Charge and our sponsorship raised resulted in a 3rd in the Victor Ludorum trophy. We have become rather possessive of Piggy (Tim Nicklin's Coup des Dames trophy) and it was such a pleasure to bring her home again. But the icing on the cake for us was winning the Unmodified class by a convincing margin.

The 2013 Rhino Charge was held at the Oldonyo Nyokie Group Ranch, Kajiado and our team amongst many others, enjoyed the format of this year's charge being shorter presenting the challenge of being able to straight-line.

David Lowe and team set us a challenge – one which many of us really enjoyed. For us the spirit of the charge is about straight lining it, team work and laughing being the ingredients for the day. We are fortunate to have remained a close knit team for many years with a pool of team members who provide the core every year. Going to the Rhino Charge is also about us being with friends and family and having the privilege to camp in parts of Kenya we would not ordinarily go to.

Of course being families the challenges of children do present themselves and on the morning of the charge, one of our team members had enjoyed a sleepless night with sick children so emotions were running high before we had begun. Coupled with no headlights, last minute alterations to the car ;the importance of team work shone through.

There are always so many highlights of the day but the funniest moment was the toughest moment for us too. Our car broke down. We had already ditched a team member down the road to start scouting the next checkpoint, we were carrying far too many ice creams from Hardy, one which slipped under the accelerator plus had a whizzing machine flying in our face videoing us reading through our notes "How to Hotwire A Car" – suddenly our spirits went from giggles and confidence to that sinking feeling that we were running out of time and options.

But then we were helped by the lads in the KVM team and the little red car started to roll. We were back on track.

By midday, with a few other hiccups, punctures, winching up several steep hillsides and tightening up the stub axle bolts that were working loose; we were now feeling the heat and the seemingly endless lava boulder fields in high grass, were testing our will power.

The two longest sections had to be tackled in the heat of the day- Pies to Vineyard Church and from Vineyard Church to Copy Cat. As we came into Vineyard Church we managed to get ourselves stuck on a large rock which we jacked ourselves off, wasting another 10 minutes of precious time, however, we did get ourselves off pretty quickly, checked in and headed back over the rocks to the next check point – Copy Cat. This section challenged our team work and our resolve. We really struggled with decisions and dragging our car with low clearance over the endless minefield of rock. With no power steering each rock reminded Tanya of the luxury we had ditched. The spikey grass seed, burrs and thorns, the twisted ankles, occasional fall from the car and jolting and bumping in the back, meant this was by far the most bruising and punishing part of the Charge for our bodies as well for the car.

By 4pm that afternoon, we had only an hour and a half left to complete the course and we had not yet made it into Copy Cat- we still had five checkpoints to go. Time was not in our favour and not a minute was to be wasted. We silently knew we could do it but it meant changing our route plan and some determination. We literally flew through the Gauntlet. In an extraordinary bit of driving from Tanya we made it

up the hill without pulling out the cable, to tremendous cheers from the spectators. We sped into our starting checkpoint, our finish at Craftsman, with 20 minutes to spare.

The huge grins on our faces said it all. We had finished. We donned our wigs and silly hats and headed to HQ where we found so many other teams who were so delighted to have completed the Charge. There was such a buzz at HQ and this time, not the buzz of a flying machine... Now it was down to distance!

Back at camp with husbands, children and friends the party began. The Charge was celebrated by us all as we had all finished and all thoroughly enjoyed the day.

The results were posted in a different way this year which made it more exciting for all the competitors and the spectators who support the event. Our surprise was winning the Unmodified Class.

A good plan is one you can change along the way – ditching the power steering was the right plan.

‘ We managed to get ourselves stuck on a large rock which we jacked ourselves off ,

‘ We are proud to be part of another million dollar Charge and our sponsorship raised resulted in a 3rd in the Victor Ludorum trophy. ’

25TH RHINO CHARGE

2013

MILLIONAIRE HEROES MULTIPLY

“We therefore
anticipate to have
65 millionaires
for next year's
Rhino Charge.”

41

cars raised over one million shillings in the 2013 Rhino Charge - 10 more than last year's, setting yet another record in fund raising. The field audit of Ksh 90,294,239.18 tells the story best. Of the 41 millionaires, seven broke the Ksh 2 million barrier.

For four consecutive years, Victor Ludorum winners, Car 5 team of Alan McKittrick, Nick Hutchinson, Bruce Knight, Tim Jessop, Jon Bovard, Dougu Smith and Graham McKittrick have surpassed the Ksh 10 million mark. This year, they raised a whopping Ksh 12,098,283. The McKittrick team continues to hold the overall fund raise record.

Hard on Car 5's heels was the second highest fund raiser Tim Carstens who was a first time entrant. His team in Car 63 banked a spectacular Ksh 5,655,879 for Rhino Ark. The Hog Chargers who raise funds for Mark Tilbury's Car 35 team this year reached Ksh 3.9 million. A total of 125 teams battled it out at the annual event held earlier this year. The Hog Charge team has raised over Ksh 30 million for Rhino Ark since the first event in 1998.

The all-girls team of Tanya Church, Helle Sejer-Hansen, Louise Leakey, Julie Church, Joanne Carroll and Gemma McRae in Car 17 known as Rhino Rouge, hit big time too with Ksh 2.2 million. John Kanyali, Team Ole Nkurunett of Car 37 this year managed to raise over Ksh 1 million. He, with his famed Mercedes Unimog, is among the favourites at the gauntlet.

Though not yet millionaires, 22 cars met their Ksh 750,000 pledges. One of these Adrian Wilcox, Team Aberdair Devils was short by Ksh 40,000 to reach the Ksh 1 million pledge.

All 65 places for the Rhino Charge 2014 were filled at the earliest opportunity this year. All places were taken with Kshs 1million pledges. We therefore anticipate to have 65 millionaires for next year's Rhino Charge.

Martin Opiyo, Williamson Power Ltd (right), hands over a generator to Valerie Gunputrav, Rhino Ark at the Rhino Ark offices. The generator was donated for use during the annual Rhino Charge event.

Alexis Vovk, Managing Director, Total Kenya (2nd right) hands over a dummy cheque to David Lowe, Clerk of Course, Rhino Charge at the Rhino Charge 2013 Driver's briefing. Looking on are Maurice K'anjenjo, Corporate Affairs, Total Kenya, and Christian Lambrechts, Executive Director, Rhino Ark.

Total donated Ksh 725,000 towards fuel running costs for this years Charge.

GREENING THE RHINO CHARGE....

Keeping with Rhino Ark's conservation mission, the Rhino Charge Committee is looking at ways to minimize the negative impact on the environment of the annual Rhino Charge event. One of the main environmental challenges of organizing such event with close to 4,000 participants or spectators in the most remote wilderness areas of Kenya is the management of wastes.

Over the years, the Committee has set more stringent rules to ensure that no waste is left scattered in the entire Rhino Charge venue. This includes a fine system that is strictly implemented to address wastes by competitors. In addition, with the support of Binscape, wastes in the Spectator Camp, at the Gauntlet and in other locations on the venue are collected. This leaves the Committee with one key question: how to dispose all the wastes once collected?

With the support of key partners, a waste sorting station was for the first time in the history of the Rhino Charge established and run during

the 2013 event. The portable station was designed, built and donated to Rhino Ark by Jan Allan from ByDesign Ltd. The station was run by Raymond Kibanga and Joseph Ochomo, two staff members from the United Nations Office in Nairobi who volunteered their time and the experience they gained in running the Near-Zero Station established in the UN Complex at Gigiri by Henry Hunt. They were both assisted by Lucas and Amos from Multiple Waste Paper Co. Ltd and members of the Ol Doinyo Nyokie Group Ranch.

After much effort, approximately 80% of the waste was properly sorted! Field estimates show that approximately 35m³ of plastic, 10m³ of aluminium and 4m³ of glass were removed from the venue for recycling.

Next year's ambitious target is to sort all the wastes generated at the event and recycle as much of the non-biodegradable waste as possible, It's our environment, our rubbish and our responsibility! Remember, the Rhino Charge is fundraising for Conservation!

1. Waste sorting station
2. Waste sorting station in full activity
3. Visit by Hassan Noor Hassan on the day of the charge
4. Sorted aluminium cans
5. Sorted glass waste
6. Compacting sorted aluminium cans
7. Loading the BIN truck with sorted waste
8. One of the two Highlands trucks three quarters full of sorted plastic waste
9. Waste sorting site after the charge

£7,045.70 RAISED IN 2013 RHINO CHARGE UK

“The UK Rhino Charge saw 12 teams traverse tricky terrain with their 4x4s”

Competitors and spectators dodged the weather to raise funds for Rhino Ark at a fun-filled event in East Sussex's Pippingford Park. The UK Rhino Charge saw 12 teams traverse tricky terrain with their 4x4s raising over £7,000 for projects that will help protect Kenya's vital forest ecosystems.

Rhino Charge UK 2013 was enjoyed by an increased number of participants and spectators and featured the usual Rhino Charge off-road antics. The Safari Run featured a guided off-road course for the less adventurous, or more sensible, which also raised funds for Rhino Ark.

Competition for the Charge was close as the top four teams were separated by only 25 points, despite a total of 500 points being on offer. Sandy Choda and his team of Rhino Charge veterans in his Range Rover Classic won the event for the second time. Second place also went to a repeat entrant, with Ian Purcell competing in his well used but faithful Diahatsu Fourtrac. Brian Bealey finished third in his Suzuki Vitara. Fourth place went to newcomer Sam Watts who only decided to enter a week before the event and raised the highest sponsorship. Sam was awarded the Victor Ludorum award for the best combined performance.

Fiona Banks and her team won the Spirit of the Event trophy for their determination and positive attitude. Fiona's team from Land Rover export specialists Conrico International were hampered in their efforts by their Tata pick-up, which, on road tyres, wasn't best suited to the off-road course. The Conrico team were still able to finish eighth by jumping into other people's vehicles at every opportunity.

Clerk of the Course Brian Hartley and his marshals from Club Off Road produced an event that was a testing challenge that favoured a team who worked together and thought about where they went rather than just off-road ability.

Eleven standard road going 4x4s joined the escorted and controlled Safari Run; having a fun day finding out just how capable their 4x4s really were off road. Most were novices and all seemed to be having more fun than they thought possible with their cars.

Final standings:

1. Sandy Choda – 480 points
2. Ian Purcell – 470 points
3. Brian Bealey – 465 points
4. Sam Watts – 455 points

RHINO CHARGE 2013 - CAR SPONSORS

THE RHINO ARK CHARITABLE TRUST NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2013

1. SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these financial statements are set out below:

(a) Basis of preparation

The financial statements summarise the transactions of the Trust and deal with the net assets at the disposal of the trustees.

The financial statements are prepared under the historical cost basis of accounting.

(b) Income recognition

Donations and Rhino Charge collections are recognised on receipt. Investment income is recognised on accrual basis.

(c) Property and equipment

Items of property and equipment are stated at cost less accumulated depreciation. Depreciation is charged on the straight line basis over the estimated useful lives of the assets.

The annual depreciation rates in use are:

Motor vehicles	25.0%
Furniture and fittings	12.5%
Computers	33.3%
Office equipment	12.5%

(d) Foreign currency transactions

Transactions during the year are converted into Kenya Shillings at the rates ruling at the transaction dates. Assets and liabilities at the reporting date, which are expressed in foreign currencies, are translated at the rates ruling at that date. The resulting differences from conversion and translation are dealt with in the income and expenditure account.

(e) Financial instruments

A financial instrument is a contract that gives rise to both a financial asset of one enterprise and a financial liability of another enterprise. The financial instruments held by the Trust are investments in the money market, trade and other receivables, bank balances and cash and trade and other payables.

All the financial instruments held by the Trust are accounted for on amortised cost basis.

(f) Receivables

Receivables are stated at nominal value, less provision for any amounts considered irrecoverable.

(g) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and short term deposits with an original maturity of three months or less.

(h) Use of estimates

The preparation of financial statements requires that management makes estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates. The more significant estimation process is related to the determination of provision for doubtful debts. Although some variability is inherent in these estimates, management believes that the amounts provided are adequate.

2. PROPERTY AND EQUIPMENT

For the year ended 31 March 2013

	Motor vehicles KShs	Furniture, fittings and equipment KShs	Computers KShs	Total KShs
COST

The financial statements have been presented in Kenya Shillings (KShs).		

CHAIRMAN'S REPORT FOR THE YEAR ENDED 31 MARCH 2013

Rhino Ark Chairman of Trustees
Michael Karanja

The year 2012-2013 was the second of continued strong consolidation for our major new projects in Mt. Kenya and Mau Mt. Eburu which commenced in this financial year.

It was also one of continued support both from thousands of donors to the annual Rhino Charge, direct corporate donations and a significant injection of value support from the Kenya Government of materials for Mt. Kenya and Mau Mt. Eburu fencing projects.

Whilst the Mt. Kenya and Mau Mt. Eburu were at the centre of our current & forward planning and funding in the year, the Aberdare Fence, Rhino Ark's flagship project, remained a major focus of funds disbursement for its maintenance.

It has taken Rhino Ark Charitable Trust 24 years to build and successfully assist in the daily running of what is recognized as East Africa's longest wildlife conservation fence.

The Aberdare Trust was officially launched by the Prime Minister on 11 May 2012. The Aberdare Trust is a public/private project and it will maintain the Rhino Ark Aberdare Fence and play an active role towards securing the objectives of the fence.

Overall funds 2012/13

The total funds raised during the financial year under review were KShs 225 million.

Despite the difficult economic times, the 2012 Rhino Charge exceeded expectations and raised at field audit a total of KShs 84 million just short of one million US dollars.

Gross donations incorporating Rhino Charge and corporate donations amounted to KShs 143 million.

The Kenya Treasury was our major donor providing KShs 82 million for fence materials and managed through our fence construction partner, KWS. As those funds were not channelled through our accounts, they are not reflected in our balance sheets, although they are earmarked in support of our fence projects in Mt. Kenya and Mau Mt. Eburu.

Every kilometre of fence built under the partnership agreements with KWS specifies that materials are provided by Treasury funds, whilst Rhino Ark's inputs include payments to personnel for each completed kilometre of fence, vehicles, machinery, fuel, tools and mobile housing. In addition both KWS and Rhino Ark commit management time for constant supervision and issues resolution with communities along the pre-planned fence alignment.

Corporate/ Conservation bodies support

Corporate and consensual grant supporters continued positively.

I would like to acknowledge the following organisations that have made generous contributions:

- Finlays for donating KShs 4.6 million for the fencing of Mau Mt Eburu and providing specific fund support for various entries to the annual Rhino Charge.
- Mpesa Foundation for donating KShs 36 million for fencing Mau Mt Eburu.

Guard Posts Construction

One Guard Post was built in the year under review on Mt. Kenya.

Mpesa Foundation pledge KShs 155 million to Mau Mt Eburu.

I am very pleased to announce that Mpesa Foundation have pledged KShs 155 million to support the Mau Mt Eburu. The construction of the 50km long wildlife proof electrified fence commenced on 14th March 2013. The fence will protect 8,715 hectares of indigenous forest within the Mau Forests Complex Water Tower.

The Mpesa Foundation's support together with that of Finlays, the Kenyan Government and of Rhino Ark core funding will develop a fully rounded ecosystem development process for Mau Mt. Eburu. It will include completion

of the fence, development of community based alleviation projects working with the Eburu Community Forest Association, tree planting and an anchor funding of KShs 30 million for an endowment trust fund similar to the Aberdare Trust. The funds will be disbursed over a three-year cycle beginning in 2013/2014.

Launch of Mt Kenya

The construction of the Mt Kenya fence was launched on 7th September 2012. The length of the fence will be approximately 450km long and will protect over 2,500 square kilometres of pristine forest. The fenced area will include the Mt. Kenya National Park and the surrounding forests which were enlisted by UNESCO in 1997 as a World Heritage Site.

A total of 40 kilometre of fence has been built as at date of this report.

The General Fund

The general fund as reflected in the balance sheet has been split into two categories namely: Fence Maintenance Reserve and Fence Construction Reserve. Twenty percent of each year's Rhino Charge donation is allocated specifically for maintenance of fence already constructed. This ensures that the huge amount of effort and money put into the conservation programme does not collapse from lack of maintenance. The maintenance reserve is therefore to earmark these funds for maintenance and not used for construction.

The fence construction reserve deficit has increased from KShs 22 million to KShs 29 million. This situation is expected to reverse during the current year. The fence maintenance reserve surplus increased during the year from KShs 56 million to KSh 64 million.

Bongo Surveillance Programme (BSP) successes

The Bongo programme continues apace, thanks to a dedicated band of conservation individuals who constantly seek out fund support from a variety of donors. Some of the funds go direct to the BSP whilst Rhino Ark secured funds from AFEW (The Giraffe Centre) of KShs 1,780,000 during the year and which form part of a two year commitment totalling KShs 4 million to support BSP in South Western Mau and Mau Mt. Eburu. The funds go towards collecting vital information about the Bongo, patrols, removal of snares and spear traps, as well as the dynamic Bongo wildlife schools outreach programmes under BSP.

USD 20,000 was also received during the year from Rare Species Conservatory Foundation towards the BSP.

In addition to the funding mentioned above from Finlays, a further Bongo support project was initiated by Finlays for the South Western Mau region during the year.

Thousands to thank

Rhino Ark has an enormous following both in Kenya and now greatly developed overseas as well. Much of the funds raise focuses upon the annual Rhino Charge where individual car entrants make substantial pledges and raise even more than their pledge each year. It is a grass roots conservation thrust within Kenyan society that has now developed a deep foundation. Every donor knows that Rhino Ark's ventures are to secure the nation's precious 'water towers' and to work in partnership with the government to ensure good governance for maximum benefits. The 2011 Environmental Assessment triggered by Rhino Ark and with support from UNEP and the East African Wildlife Society's Kenya Forests Working Group (KFWG) has placed a value on the Aberdares alone at KShs 59 billion annually in good/services (water being the most important) and in biodiversity benefits.

It is always difficult to single out thanks in a report like this. Rhino Ark Charitable Trust has thousands of donors in Kenya and friends overseas who support our home grown and home driven conservation initiative.

I thank all of you for your generous support.

I wish to specially thank the Rhino Charge Committee and the huge band of volunteers who yearly give so much time, thought, ideas and energy to running this unique event.

Michael Karanja
Chairman, Board of Trustees

The wildlife crime challenge:

Rhino Ark's contribution to the fight against poaching.

Poaching has become one of the most pressing conservation challenges in Kenya and in many other parts of the continent. It is also a key challenge in Mt. Kenya and the Aberdares that are habitats to vulnerable species, such as the elephant, as well as critically endangered species, including the black rhino and the mountain bongo antelope.

Since 1989, Rhino Ark has been implementing practical solutions to address poaching and mitigate human-wildlife conflict in Kenya's critical water catchments and important biodiversity areas. Electric fences - Rhino Ark's flagship conservation interventions - have been proven as effective tools to address these conservation challenges.

In addition to electric fences, Rhino Ark is developing and implementing a range of complementary management tools to assist Kenya Wildlife Service (KWS) and Kenya Forest Service (KFS) in combating wildlife crime, in particular poaching of animals and illegal extraction of forest products. These tools aim at improving: 1) controlled access to natural resources inside protected areas; 2) communities and leaders engagement in conservation; 3) patrolling and monitoring of the protected areas; and, 4) law enforcement.

Controlled access to natural resources inside protected areas

The completed 400 kilometre electric fence around the Aberdare Range, together with the fences under construction around Mt. Kenya and Mau Eburu, are effective management tools

assisting KWS and KFS in controlling access to the protected areas and the natural resources therein. The 2002 aerial survey of the Aberdares clearly highlighted a substantial reduction in illegal forest resources extraction in the forest areas protected by the fence. This was further established in the comprehensive 2011 Environmental, Social and Economic Assessment of Fencing the Aberdare Conservation Area which also confirmed a significant improvement of the forest cover in the Aberdare ecosystem.

To improve the effectiveness of the fences, Rhino Ark, together with partners, is strengthening the fence maintenance and management framework by: a) establishing gate management rules; b) developing guidelines for community involvement in the manning of gates; and c) identifying best practices for the overall management of fences.

Communities and leaders engagement in conservation

The long-term conservation of a protected area can only be achieved through the active engagement and participation of the surrounding communities and their leaders. Much of the illegal activity taking place in protected areas can be avoided if community members are adequately engaged in environmental conservation and the sustainable use of natural resources.

Rhino Ark has developed and is implementing a range of activities targeting communities and their leaders:

Governors and county ministers from the Mt. Kenya / Aberdare region at a workshop on environmental conservation.

a) **Environmental awareness:** Every year, Rhino Ark together with Kenya Wildlife Service and the Ministry of Education organize the Aberdare Fence Relay. Approximately 600 children and 120 teachers from 60 primary schools participate in this annual Run. The Run aims at raising awareness among the youth living around the Aberdare ecosystem of the importance of conserving this critical water tower, which provides most of the drinking water for Nairobi and the urban centres located around the ecosystem. The Run also provides an opportunity to appreciate the benefits derived from the electric fence which has greatly reduced human-wildlife conflicts around the Aberdares and assisted in curbing illegal activities in the forest.

b) **Environmental education:** The Bongo Surveillance Programme (BSP), established in 2004 and supported by Rhino Ark, is dedicated to the protection and monitoring of the Mountain Bongo antelope and their habitats. The BSP is spearheading the establishment of Bongo Wildlife Clubs to raise awareness amongst local communities about the environment and the Bongo in particular, and is organizing education programmes for schools around the Aberdares, Mt. Kenya and the Mau Forests Complex.

In addition to the BSP education activities, Rhino Ark together with the Ministry of Education has developed local environmental curricula for primary and secondary schools around Mt. Eburu. The implementation of the curricula will start in November 2013. The curricula are customized to the environmental and socio-economic situation of the area.

c) **Engaging community leaders:** Prior starting any of the phases of the Mt. Kenya Electric Fence, Rhino Ark together with KWS and KFS, organize a workshop for the leaders of the area to sensitize them on the threats to the ecosystem and their roles, as leaders, in engaging their communities towards addressing such threats. Two workshops attended each by approximately 100 leaders were held on 4 December 2012 and 12 November 2013.

Together with KWS, Rhino Ark organized a Mt. Kenya / Aberdares County Leaders Consultative Meeting on the Environment. Six Governors attended the meeting as well as county ministers. The meeting was opened by keynote statements by the Principal Secretary, Ministry of Environment, Water and Natural Resources, and the KWS Director with much focus on poaching and the threat it represents to economic development at county level.

The Aberdare Fence Relay Run flagged off by Deputy Governor of Nyeri, Amb. Githaiga

Mt. Kenya aerial surveillance team comprising of KWS, KFS, Mount Kenya Trust and Rhino Ark.

Magistrates' Retreat, Meru National Park, 27-29 September.

Patrolling and monitoring protected areas

Patrols are essential to deter any would-be poachers, detect emerging issues and engage daily with community members. Rhino Ark has developed a twin patrol programme that comprises ground patrols and aerial surveillance, and is assisting KWS and KFS in strengthening their regular patrols:

- a) **Ground patrols:** As part of the Bongo Surveillance Programme, a Bongo Surveillance Unit (BSU) was established comprising 15 experienced trackers from local communities. They conduct regular patrols, collect evidence of Bongo presence, report on any illegal activity and remove snares and traps. The BSU collected over 300 snares and 19 elephant spear traps in a two month period during 2012/3, potentially saving many wild animals from certain harm.

In addition, Rhino Ark, together with KWS and KFS, established the Aberdare Joint Surveillance Unit. The Unit comprises five trained community members who conduct ground patrols in all the hotspot areas in the Aberdare Conservation Area.

- b) **Aerial surveillance:** Since February this year, Rhino Ark is organizing and facilitating systematic surveillance flights above Mt. Kenya and the Aberdares. KWS, KFS and Rhino Ark jointly participate in the flights that enable the detection of illegal activities in the most remote areas.
- c) **Strengthening KWS and KFS regular patrols:**
- Rhino Ark has secured the support of the British Army Training Unit Kenya (BATUK) to provide tactical and medical trainings to KFS and KWS rangers in Mt. Kenya/ Aberdare area;
 - Rhino Ark has assisted in the establishment of two joint KWS/KFS patrol bases near hotspots areas in the Aberdare eco system. The hotspots were identified during the surveillance flights that are carried quarterly;

- Rhino Ark has donated five 4x4 Suzuki Maruti to KWS to assist field managers in Aberdare and Mt. Kenya in security patrols and fence maintenance.

Law enforcement

Impunity can lead to a breakdown of law and order with very negative impacts on conservation. To prevent impunity and deter wildlife crime, Rhino Ark works with law enforcement agencies in the areas of intelligence gathering and prosecution.

- a) **Intelligence gathering:** Rhino Ark has developed a programme aimed at supporting intelligence gathering in the Mt. Kenya ecosystem. The programme will be extended to the Aberdares ecosystem.
- b) **Prosecution.** Only seven (7) percent of the wildlife cases brought before court over the last three years have been settled. To address such backlog, as well as ensure successful prosecution of wildlife crimes, Rhino Ark together with KWS, Space for Giants and Mount Kenya Trust organized a retreat for magistrates from the Mt. Kenya / Aberdares region. The retreat helped sensitize the magistrates on the importance of wildlife crimes and their economic impacts, as well as identify ways to improve the prosecution of such crimes. Together with the same partners, Rhino Ark is currently working on targeted activities towards a more effective prosecution of wildlife crimes.

In the Eburu ecosystem, Rhino Ark, together with KFS, visited the various Police Stations in September 2013 to sensitize senior Police officers who are public prosecutors on the importance of wildlife crimes.

Highlights from the mountains...

Mt. Kenya Ecosystem

- Fence Construction: 40 kilometres built as of 13 November 2013. It is expected that Phase I, a 50 kilometres stretch from Kiringa River to Thuchi River, will be completed in early 2014.
- Mt. Kenya Electric Fence built with plastic posts since August 2013. Plastic posts offer many benefits: they last much longer than wooden posts; they do not break when pushed by elephants; they are made from plastic waste, hence help clean the environment; they do not need insulators, reducing the fence build cost.
- Energizer house at Castle Forest Station officially opened on 22 May 2013 by the Chairman of KFS Board.
- Aerial surveillance programme of Mt. Kenya forest launched in July 2013. Two flights have already been carried out covering Kirinyaga, Embu and Tharaka-Nithi counties. KFS, KWS, Rhino Ark, as well as Mount Kenya Trust participate in the flights.

Opening of the Castle Fence Energizer House, Mt. Kenya, by Mr. Peter Kirigua, Chairman of the Board of Kenya Forest Service.

Eburu Ecosystem

- **Fence construction:** 17 kilometres of fence are now fully built and powered as at 23 October 2013. The fence crew has built 3.3 kilometres in the past one month of construction.
- **Safaricom staff build Fence:** 60 Safaricom staff members accompanied by 40 rangers of the Kenya Defence Forces (KDF) came to Ole Sirwa in Mau Eburu to help build 200 metres of the electric fence on 14 August 2013.
- **Morop fence energizer station substantially completed:** The first fence energizer station in Eburu has been substantially completed and will be ready for occupation by the early November 2013. The station has been built with funding from MPESA Foundation as part of their support for the fence infrastructure component of the Eburu Ecosystem Conservation Project, at a cost of Ksh 6.6 million.
- **Rhino Ark organizes forest rehabilitation stakeholder forum:** on 8 October 2013, Rhino Ark organized a half-day workshop for stakeholders involved or interested in rehabilitating Eburu Forest. The forum agreed on the modalities for a better coordinated and more successful replant programme in Eburu Forest, and that the planting of young trees should only take place in forest areas already fenced to attain higher survival rate.
- **Working with communities on water issues:** On 30 July 2013, Rhino Ark facilitated a workshop in Naivasha to discuss the Ndibithi community borehole, which failed in 2011. The workshop was attended by local community leaders, local administration, Water Resource Management Authority, WWF, the area County Representative and Rhino Ark. The workshop established a collaborative framework and enabled the participants to chart a way forward.
- **Conservation education for Eburu youth set for roll out:** In April 2013, Rhino Ark engaged a consultant to work with stakeholders to develop and implement conservation education curricula for local Eburu schools. A 12-person implementation team that includes local teachers, education officials, the Eburu Community Forest Association, WRMA, Kenya Wildlife Service, Kenya Forest Service and Rhino Ark was formed for this purpose. The team has completed the development of the comprehensive curricula, which comprises primary and secondary school curricula and detailed teachers' guides. Implementation roll-out is now set for November 2013 in Eburu schools under the guidance of the implementation team.
- **Finlays donates Ksh 4.4 million:** In August, Finlays, the horticultural export company that borders the Mau Forest complex donated funds to build a section of the Mau Eburu fence. The donation is a continuation of an on-going support policy for the fencing of Mau Eburu and is in line with their enduring commitment to sustainability. Finlays' Kingfisher farm in Naivasha continues to produce the plastic posts that are used in Mau Eburu. The plastic posts have proved their resilience and have an indefinite lifespan as compared to the wooden posts that eventually disintegrate.

Morop fence energizer station

Safaricom staff build fence

Section of completed fence line

Aberdares Ecosystem

- Improved fence management framework well underway, with new gate management rules adopted, guidelines for community involvement in the manning of the gates under review and improved practices for the management of electric fences identified and now under discussion.
- First phase of the upgrading of guard posts completed. The first phase focused on high priority rehabilitation work, which includes repair of leaking roof, providing access to water; providing/repairing sanitation; and establishing connections to the GRID.
- Review of the management of each individual gate underway, with one gate already closed and three gates reduced from vehicle to pedestrian gate.
- Fourth edition of the Aberdare Fence Relay Run successfully completed. 600 children and 120 teachers from 60 primary schools participated in this year's Run.

Aberdares / Mt Kenya Ecosystems

- County leaders engaged in conservation. Rhino Ark together with KWS organized a one-day consultative meeting on the environment for Mt. Kenya / Aberdares county leaders on 30 August. Six Governors participated in the meeting, as well county ministers. Rhino Ark fencing projects received unanimous welcome during the meeting.
- 23 magistrates from 14 stations sensitized on the need to address wildlife crime. Rhino Ark, together with KWS, Space for Giants and the Mount Kenya Trust, organized a retreat for magistrates in Meru National Park on 27-29 September. The retreat enabled the identification of weaknesses in the process of bringing poachers to justice, and ways to strengthen collaboration towards successful prosecution of environmental crimes.

New look for Rhino Ark offices

The renovation of Rhino Ark main offices located in the premises of KWS HQ on Langata Road has just been completed. The renovation that was made possible thanks to the support of KWS, enabled the creation of new office spaces, including a boardroom, one extra office, a store, as well as a large common area. During the renovation, over 90% of the building materials were reused as to reduce the impact on the environment. The renovated offices were officially opened by Dr. Kasiki, KWS Deputy Director on 7 November.

THANK YOU!

Rhino Ark wishes to thank the following people and companies who have provided services or specific donations in cash or kind to Rhino Ark.

- **Goodyear Kenya Ltd** - Support assistance for Rhino Ark vehicles
- **Gallagher** - Logistical support & sponsoring the Rhino Charge 2013 Programme
- **Kenya Tourism Federation** - Assistance of conference room
- **KWS** - RA Offices
- **Capital FM** - Free Press Coverage for 2013 Rhino Charge
- **John Bowden** - Organizer, Rhino Charge, UK
- **Total Kenya** - Fuel, Rhino Charge 2013
- **Mr & Mrs Crooks** - Cash donation
