EXECUTIVE DIRECTOR'S VIEW

CHRISTIAN LAMBRECHTS

Over the past six months, much focus has been given to strengthening Rhino Ark as an organization. This has been necessitated by the greatly expanded portfolio of conservation work we are undertaking, made possible by the support received through the Rhino Charge. Indeed, this year's Charge broke all records and expectations with a fundraise of KES 139 million. The sizzling intensity of the fundraise competition between Rhino Charge entrants, led by Stanley Kinyanjui (car 62), Peter Kinyua (car 23) and Alan McKittrick (car 5) is a most promising and very welcome development. These three cars alone raised a whopping KES 36 million. I offer a special thank you to the Charge competitors for yet another incredible effort.

Rhino Ark has adopted a new constitution, which provides better-defined objectives and expands the governance structure. In addition to the Board of Directors, formerly known as Trustees, an Annual General Meeting attended by up to 20 members has been set up to support the Rhino Ark management team in the area of governance, networking, public relations and resource mobilization. This is in line with the statutory requirements of the NGO Coordination Board that regulates the NGO sector.

A 5-year strategy for the period 2017-21 has been prepared, which articulates the vision and mission of the organization and spells out the six priority thematic areas, namely: (1) Protection of Kenya's mountain forests, other threatened habitats and their rich biodiversity; (2) Engagement and education of adjacent communities in conservation; (3) Securing the connectivity between mountain forests and other threatened wildlife habitats; (4) Establishment of sustainable financing mechanisms for the conservation of mountain forests and other threatened wildlife habitats; (5) Advocate nationally and internationally for the conservation of the mountain forests and other threatened habitats, their wildlife and their ecological functions; and (6) Use of science to assess the impacts of, and review conservation interventions.

A new management structure has been developed, providing for the strengthening of the Rhino Ark management team in the areas of resource mobilization and public relations. The strategy also broadens the resource mobilization base of the organization, with Rhino Ark offices in the US and UK now given specific fundraise targets. Endowment funds and payments for ecosystem services schemes are now key focus areas in Rhino Ark's fundraise operations.

These new developments reinforce existing operations and provide Rhino Ark with the necessary foundation to tackle current and emerging challenges affecting our mountain forests and their threatened wildlife.

RHINO ARK OBJECTIVES

Rhino Ark seeks solutions to the challenges facing the mountain forest ecosystems of Kenya, also known as the water towers. More specifically, Rhino Ark aims to:

- Conserve such ecologically precious indigenous forests and their provision of vital environmental services;
- Create a sustainable and harmonious environment that enables people and wildlife, including all flora and fauna, to coexist; and,
- Create and provide sustainable programmes for forest edge communities based on payments for ecosystem services. Such programmes and projects will be tailored to create income generation for the communities that support the conservation of natural resources.

Rhino Ark is committed to:

- Mobilize stakeholders nationwide and internationally for initiatives to protect and conserve the habitat and promote managed use of forest

products for the benefit of present and future generations;

- Raise funds and other forms of support to develop sound management processes over entire eco-systems;
- Create frameworks where wider society and forest edge communities become involved in the management processes through public-private partnerships; and,
- Build mechanisms and management structures to prevent illegal exploitation of the forest habitat wherever it is threatened.

In so doing all stakeholders will benefit and the flora and fauna, particularly endangered species, will be better secured.

Our conservation work is anchored in three key values:

- Protecting ecosystem integrity;
- Ensuring full involvement of and participation by local communities; and,
- Forming effective partnerships.

Alan McKittrick, Jon Bovard, Graham McKittrick, Doungu Smith, Kyle Ray and Bruce Knight of Car 5 receive their trophies after emerging first overall

FUNDS AWARDS

1st David Schaefer Trophy:	Stanley Kinyanjui/Magnate Chargers	KES: 14,500,000	Car 62
2nd Diamond Trust Trophy:	Peter Kinyua/John Macharia/Robert Kariuki	KES: 11,215,000	Car 23
3rd Highest cash sponsorship:	McKittrick/Knight/McKittrick/Smith/Ray/Bovard	KES: 10,315,243	Car 5

EVENTS AWARDS

1 st Overall (Duncan Mitchell Perpetual Trophy):	McKittrick/Knight/McKittrick/Smith/Ray/Bovard	Car 5
2 nd Overall:	Team 42: Neil McRae	Car 42
3 rd Overall:	Team Bundufundi: Sean Avery	Car 38
Victor Ludorum (Land Rover Trophy):	McKittrick/Knight/McKittrick/Smith/Ray/Bovard	Car 5
1 st in Class U:	The Dik-Dik's: Peter Castle	Car 39
1 st in Class M:	McKittrick/Knight/McKittrick/Smith/Ray/Bovard	Car 5
Coupe Des Dames (Tim Nicklin Perpetual Trophy):	Team Bushbabes: Sabine Kontos/Petra Somen/Catherine Coulson/Lucy Waddington/Emma Morton/Millie Seagon	Car 19
Spirit of the Charge (Rob Combes Trophy):	The Roving Rogues: Peter Francombe	Car 40
Tim Samuels Gauntlet Challenge:	Team 49: Patrick Garner/Terry Childs	Car 49
Tiger Line 1 (Njia ya Ndume Award):	Team Dirty Berty: James Hendriksen	Car 65
Tiger Line 2 (Njia ya Ndume Award):	Fat Rhinos: Jaspal Matharu	Car 24
Kamran Fazal Memorial Trophy:	Graham McKittrick	Car 5
Properly shafted Award:	Mahesh Bhatti/Pier Luigi Vigada/ John Michino/Ashish Bhatti/Pritpal Singh Wilkhu	Car 7
Most Meritorious International Team:	Gumtree 4x4: John Bowden/Simon Davies/Matthew Evans/Michael Davies/Warren Evans	Car 9
The Kijabe Award:	Team Douglas: Keith/Roberts/Piet/Jethwa/Mason/Ker	Car 25
The Garmin "MMBA" Award:	Bhaji/Shafi/Saigar/Vaiani/Bhaji/Anwar	Car 8

OUR TEAM SPIRIT

We would like to express sincerest appreciation to all those who made it possible to stage the event:

ORGANISING COMMITTEE AND OFFICIALS

David Lowe - Chairman Rhino Charge Committee/Clerk of the Course
 Christian Lambrechts - Rhino Charge Committee/ Executive Director Rhino Ark
 Max Meinzingen - Rhino Charge Committee/ Logistics/Search & Rescue
 Simon Welland - Rhino Charge Committee/Results
 Stephen Grant - Rhino Charge Committee/Logistics/ Security
 Gran Calder - Rhino Charge Committee/Logistics/ Security
 Asim Shah - Rhino Charge Committee/HQ/Radios
 Pierre Parsons - Rhino Charge Committee/Scrutineering
 Tarsem Sembhi - Rhino Charge Committee/Water & Fuel
 Valerie Gunputrav - Rhino Charge Committee/ Rhino Ark Liaison
 Jeremy Andrade - Rhino Charge Committee/ Scrutineering

RHINO CHARGE UK RAISES £4,250

On Sunday 18th September, the UK Rhino Charge, a day-long off-roading event and sister to the world famous Kenya Rhino Charge, raised £4,250 for the conservation charity Rhino Ark. The annual fundraiser took place in West Hoathly, West Sussex, and attracted teams from around the UK.

The competition included a number of stages for the vehicles to complete, including a tyre dragging race, a blindfold challenge and a navigation time trial. The event attracted competitors with varying levels of experience and saw a wide range of off-road vehicles compete, from the smallest, a Suzuki Vitara, to a large 4x4 Mercedes Sprinter van.

John Bowden of Gumtree 4x4 and coordinator of UK Rhino Charge, said, "It was great to see regular and new supporters and competitors entering UK Rhino Charge at Hook Farm on a lovely, summer's Sunday and raising over £4,250 for Rhino Ark. As well as helping financially with the ongoing conservation work in Kenya, this event helps to raise awareness of the charity's work in the UK."

This year's stakes were high as the Victor Ludorum (a combination of competition performance and sponsorship raised) is guaranteed a place in next year's prestigious Kenya Rhino Charge. The award went to Preyen Patel who will now have the opportunity to travel to Kenya and compete against some of the most experienced off road drivers in the world.

UK Rhino Charge 2016 raised nearly £1,000 more than last year's challenge and will make a sizeable contribution to Rhino Ark's new projects in Kenya. After the successful construction of the Aberdare mountain range fence in 2009, Rhino Ark is now working on building a 450 km fence around Mt. Kenya. As in the Aberdares, the aim of the fence is to address human-wildlife conflict and protect Kenya's water towers.

ALL HAIL THE 2016 FUNDRAISE CHAMPIONS - CAR 62

Rachel Karanu's first timer experience at the Rhino Charge with Car 62- Magnate Chargers

Car 62-Magnate Chargers has participated in Rhino Charge since 2009. This year I got the chance to be a part of this dynamic team in my first ever Rhino Charge event. The Charge day was the climax of a series of fundraising activities to win the most prestigious and coveted trophy of the day, the David Schaefer Trophy for the highest fund-raise in a single event.

The team exceeded all expectations by raising a whopping Ksh. 14,500,000 - a ground-breaking feat considering that the 2015 Charge had seen us raise Ksh. 4,273,000. Remembering the activities that ensured our success brings a smile to my

face. Behind every great team achievement there is a leader who gives direction and is passionate about winning. Car 62 has such a leader in Stanley Kinyanjui - 'Stano', the charismatic Managing Director of Magnate Ventures Limited, who had vowed to take the trophy home.

'Stano' set up a Rhino Charge secretariat which comprised of the entire Magnate Ventures management team. The company's leaders truly drove the agenda. Weekly (yes, WEEKLY!) progress review meetings were held. It was an agenda that was taken very seriously. Various fundraising activities were planned to include Individual Manager Fundraising, Corporate Fundraising and Partner/Supplier Fundraising. Magnate Ventures staff, myself included, had lots of fun putting together the fundraising events,

among which were a Golf Tournament held at Muthaiga Golf Club in April and a Quiz Night held at Sarova Panafric Hotel in May. Naturally, I do not want to give leakage to our competition for 2017. The teamwork did not end there. A support crew was selected to be part of the Charge event, and the team swept into the venue in style in a Magnate Ventures branded fleet of 5 gleaming double cabin pick-ups, doing what we do best, "Keeping Visible".

The Magnate Chargers competition team was led by 'Stano', along with our greatest partner and supporter Mburu Kangethe. Other members of the team included Sharon Wambua (Scout), Edward Muniu (Navigator), Ostrich Nyaga (Driver) and Charles Wambua (Head Mechanic). This year the team competed using an unmodified Jeep

Wrangler instead of the usual Range Rover. The white Jeep, shiny and new, had swag! It was fitted with an LED scrolling screen highlighting our main fundraising sponsor, Sportpesa, which while quite a sight to behold, did not survive the event. Well..., they say it's the thought that counts!

As this was my first event, I was eager to experience the legendary "Bundu Bashing" of the Charge and watch our team battle it out with the other competitors. It did not disappoint, and I enjoyed watching all the action. Our team managed to complete 8 checkpoints out of 13. Afterwards, the bush party was off the chain, and I must say the stories I've heard didn't do it justice. There were many people who

attended and competitor team crews that showed up to celebrate their various accomplishments during the Charge... And then there was us, the spectators, who had the most fun at the Charge. Did I mention the camping? It was an altogether new experience for me but, I totally loved it: the camp fires and bonding with the team...Take me back! When it was over, 'Stano' had to bring the trophy home in style, and we left the venue in a victorious convoy.

To me the Rhino Charge will always be a very special event and I look forward to attending many more. The planning, fund raising and team meetings is the ultimate bonding exercise. Yet all this would not have been possible without our clients who were our greatest supporters: Sportpesa, Safaricom, Karen Hospital, UAP, Seven Seas, Family Bank just to name a few - Magnate Chargers Car 62 is indebted to you.

The main reason for the event must not be forgotten, fund raising for the protection of Kenya's Water Towers. This sport supports such a noble cause. Protecting our environment is of utmost importance and the Magnate Team are proud to be associated with Rhino Ark and its conservation efforts in Kenya's precious ecosystems.

Where do we go from here? Car 62 can only grow bigger and better. I am excited at the thought of Rhino Charge 2017. To the rest of the participants, we say "bring it on!" See you there as we look to win the trophy again.

THE RHINO CHARGE CALENDAR- 2017 EDITION

The colourful Rhino Charge calendars for the year 2017 are now ready. Like the previous years they contain some of the most stunning photographs of the past Charge event.

This year there are FIVE different Rhino Charge calendars. This way, every competing car that participated in the 2016 event is equally featured. This makes the calendar an ideal "thank-you" token for any car sponsors.

Calendars are available from Text Book Centre outlets (Junction; Sarit Centre; Thika Road Mall; Galleria and The Hub). Proceeds from the sale of the calendars will go to support Rhino Ark's conservation work.

Many thanks to our advertisers who supported this project, the calendar designers and to those who have donated their photographs.

If you wish to make any order, please contact Belinda Levitan (b@bbk.co.ke).

RHINO ARK NEWS

FLAMINGO EXPANDS ITS SUPPORT TO RHINO ARK

The posts production team

Posts production building

Polythene paper shredder

Finished post being lowered into the cooling bath

Finished posts ready for collection

Producing flowers, vegetables and herbs across East Africa and trading throughout Europe, Flamingo Horticulture Kenya is the largest horticultural exporter from the region.

We are focused on performance and growth which is great for East Africa.

We also care about planet earth and are leaders in best practice for minimal environmental footprint. The fragile ecosystems around us require unity from business and the community if we are to protect them for future generations.

Flamingo supports an array of grass-roots charitable initiatives and is delighted to strengthen and enlarge its partnership with the Rhino Ark Kenya Charitable Trust. Recently, Flamingo and Rhino Ark signed a binding contract which cements the onward supply of 500 free of charge plastic posts per month which are used to fence the Aberdare, Mau Eburu and Mount Kenya. Posts are manufactured on Flamingo's Kingfisher Farm in Naivasha using waste plastic from rose greenhouses. The plastic is put through a heat and pressure process creating durable and termite proof posts which not only protect delicate ecosystems but also safeguard Kenya's forests which is so vital for water security.

To date, 60% of all posts used by Rhino Ark on forest boundaries have come from the joint Flamingo - Rhino Ark production facility but it doesn't stop there, we are now scoping plans to duplicate the process across the Flamingo estate so that more posts can be produced in proximity to their eventual forest boundary destination; this will cut transport cost and speed up forest protection initiatives.

This is a fantastic project solving waste and recycling issues whilst simultaneously protecting wildlife and habitat for the benefit of onward species diversity, tourism and wider agricultural production in Kenya.

Flamingo continues on its path to create value and to protect the people and the environment around us.

Thomas Frankum.
Managing Director.
Flamingo Horticulture Kenya Ltd.

THE RHINO ARK CHARITABLE TRUST NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2016

1. SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these financial statements are set out below:

(a) Basis of preparation

The financial statements summarise the transactions of the Trust and deal with the net assets at the disposal of the trustees.
The financial statements are prepared under the historical cost basis of accounting except where otherwise stated in the accounting policies below.

(b) Income recognition

Donations and Rhino Charge collections are recognised on receipt.
Investment income is recognised on accrual basis.

(c) Property and equipment

Items of property and equipment are stated at cost less accumulated depreciation. Depreciation is charged on the straight line basis over the estimated useful lives of the assets.

The annual depreciation rates in use are:

Motor vehicles	25.0%
Furniture and fittings	12.5%
Computers	33.3%
Office equipment	12.5%

(d) Foreign currency transactions

Transactions during the year are converted into Kenya Shillings at the rates ruling at the transaction dates. Assets and liabilities at the reporting date, which are expressed in foreign currencies, are translated at the rates ruling at that date. The resulting differences from conversion and translation are dealt with in the income and expenditure account.

(e) Financial instruments

A financial instrument is a contract that gives rise to both a financial asset of one enterprise and a financial liability of another enterprise. The financial instruments held by the Trust are investments in the money market, trade and other receivables, bank balances and cash and trade and other payables.

All the financial instruments held by the Trust are accounted for on amortised cost basis.

(f) Receivables

Receivables are stated at nominal value, less provision for any amounts considered irrecoverable.

(g) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand and short term deposits with an original maturity of three months or less.

(h) Use of estimates

The preparation of financial statements requires that management makes estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates. The more significant estimation process is related to the determination of provision for doubtful debts. Although some variability is inherent in these estimates, management believes that the amounts provided are adequate.

2. PROPERTY AND EQUIPMENT

(a) For The Year Ended 31 March 2016

	Motor Vehicles	Furniture, Fittings And Equipment	Computers	Total
	KES	KES	KES	KES

At 31 March	51,759,615	59,392,552
Twenty percent of each year's Rhino Charge donation is allocated specifically for maintenance of fence already constructed.		
8. INCOME		
Rhino Charge collections (note 8(a))	103,797,037	99,491,069
Other donations	26,291,073	33,417,032
Interest income	3,796,245	2,152,783
Other income (note 8(b))	4,971,659	9,773,321
	138,856,014	144,834,205
a) RHINO CHARGE COLLECTIONS		
Rhino Charge 2016	12,736,610	-
Rhino Charge 2015	91,060,427	8,533,994
Rhino Charge 2014	-	90,957,075
	103,797,037	99,491,069

In the current year, the Trust changed the accounting treatment for the Rhino Charge collections from Rhino Ark UK and Rhino Ark USA. In prior years, the Trust was accruing for the income not yet received from Rhino Ark UK and Rhino Ark USA as the Trust expected to receive the donations collected by both entities. However, from the current year, the Trust started recognizing these collections only when received. The accounting treatment was changed to record these donations from UK and USA only when funds were received or there were approved board minutes from UK or USA to transfer funds as they are separate entities.

	2016 KES	2015 KES
b) OTHER INCOME		
Bongo Surveillance Project	2,916,643	5,099,024
Landowners Access Fee	77,600	2,606,200

The financial statements have been presented in Kenya Shillings (KES). Audit by **ERNST & YOUNG**

CHAIRMAN'S REPORT FOR THE YEAR ENDED 31 MARCH 2016

The year 2015-2016 was marked by major milestones in our major new projects in Mt. Kenya and Mau Mt. Eburu which commenced in the financial year 2012-2013. It was also the fourth year of continued strong consolidation of Rhino Ark's expanded programme.

It was also one of continued support both from thousands of donors to the annual Rhino Charge, direct corporate donations and a significant injection of value support from the IFAD-funded Upper Tana Natural Resources Management Project of materials for Mt. Kenya fencing project.

Whilst the Mt. Kenya and Mau Eburu were at the centre of our current & forward planning and funding in the year, the Aberdare Fence, Rhino Ark's flagship project, remained a major focus of funds disbursement for its maintenance.

In addition, Rhino Ark has expanded its conservation work in the Mau, as a partner and an adviser to the Netherlands-based IDH Sustainable Trade Initiative in the formulation and early implementation of their project "Initiative for Sustainable Landscape (ISLA)" aiming at conserving South Western Mau Forest Reserve and bringing sustainability in the broader South Western Mau landscape.

In 2014, Rhino Ark began the rehabilitation of the Phase I of the electric fence, along the Eastern Salient of the National Park. The 38-kilometre phase that was completed in 1992 has now outlived its intended lifespan. The rehabilitation will extend the fence lifespan by another 20 years. This expresses the long-term commitment of Rhino Ark to the conservation of the Aberdare ecosystem and to providing sustainable solutions to the challenges facing Kenya's water towers.

Overall funds 2015/16

Despite the difficult economic times, the 2015 Rhino Charge exceeded expectations and raised at field audit a total of KES 108.7 million or just above US\$ 1.1 million.

Gross donations incorporating Rhino Charge, Corporates and other donation amounted to KES 139 million. Donations from the forest-adjacent communities in the Imenti area amounted to KES 6 million.

The IFAD-funded Upper Tana Natural Resources Management Project was our major donor providing KES 42 million for fence materials. As those funds were not channelled through our accounts, they are not reflected in our balance sheets, although they are earmarked in support of our fence projects in Mt. Kenya.

Every kilometre of fence built under the partnership agreements with KWS specifies that materials are provided by Treasury funds or key partners, whilst Rhino Ark's inputs include payments to personnel for each completed kilometre of fence, vehicles, machinery, fuel, tools and mobile housing. In addition both KWS and Rhino Ark commit management time for constant supervision and issues resolution with communities along the pre-planned fence alignment.

Corporate/conservation bodies support

Corporate and consensual grant supporters continued positively.

I would like to acknowledge the following organisations that have made generous contributions:

- IDH-ISLA for donating KES 1.53 million for a feasibility study of establishing a physical barrier along the north-eastern boundary of South Western Mau Forest Reserve, as well as KES 630,000 for advisory services

and aerial surveillance.

- Mpesa Foundation for donating KES 12.44 million for the Mau Mt. Eburu Fencing Project which is part of the KES 155 million pledged by Mpesa Foundation in support of the conservation of that ecosystem. The foundation also donated KES 6.21 million for tree nurseries project. This is part of the KES 9.3 million pledged by Mpesa Foundation in support towards the establishment of model tree nurseries around Eburu forest
- Calgary Zoological Society for donating GBP 3,301.20 towards Bongo Surveillance Project
- A further USD 23,000 from Kelley Grant towards Bongo Surveillance Project.

Mau Mt. Eburu conservation and fencing project well underway

The construction of the 43.3 kilometres perimeter wildlife proof electrified fence completed in November 2014 is now over a year old. The fence will protect 8,715 hectares of indigenous forest within the Mau Forests Complex Water Tower.

Rhino Ark, along with KWS, KFS and Loldia Farm have nearly completed securing the wildlife corridor between Eburu Forest reserve and Lake Naivasha, with the establishment of two wildlife gates, one joint security outpost, one wildlife water point and 3.5 km of electric fence, completing the fencing of the eastern side of the corridor.

Rhino Ark is also supporting the establishment of nine model tree nurseries in selected schools around Eburu Forest. The first two nurseries, in Emmanuel Primary and Ndabibi Primary Schools have commenced.

The Mpesa Foundation's support together with that of Finlays, the Kenyan Government and of Rhino Ark core funding helps develop a fully rounded ecosystem conservation process for Mau Mt. Eburu. It includes completion of the fence, development of community-based natural resources management projects, forest rehabilitation and an anchor funding of KES 25 million for an endowment fund to be managed by a trust similar to the Aberdare Trust.

Mt Kenya fencing project

A milestone in the construction of the Mount Kenya Electric Fence has been reached with the completion of 100 kilometres of the comprehensive fencing that will eventually encircle Mount Kenya. By the time it is finally constructed, the fence will reach 450 kilometres – giving protection to a World Heritage Site, a precious water towers and a unique range of biological diversity. The built fence currently runs from Kiringa River, Kirinyaga County, passes through Embu and Tharaka Nithi counties and is now few kilometres away from Thingithu River in Meru County. The Mount Kenya Electric Fence is constructed under a public-private partnership, involving Government agencies (Kenya Wildlife Service and Kenya Forest service), Rhino Ark, the Upper Tana Natural Resources Management Project, Mount Kenya Trust and the local communities.

With technical support from ESRI – one of the world leading mapping software companies - and Kenya Wildlife Service, Rhino Ark completed the development of a Patrol Monitoring System for Mt. Kenya. Four rangers from KWS and two scouts from Mount Kenya Trust were trained in the use of the system that was tested over a period of six weeks. Once fully tested the system will be deployed to all patrol teams on Mt. Kenya.

Aberdare ecosystem

The Aberdare Joint Surveillance Unit (AJSU), which has been strengthened, conducted a series of operations in the Northern Aberdare. The purpose of the continued patrolling efforts is to address illegal activities in Northern Aberdare which is a known hotspot area.

The implementation of the Aberdare Trust is in process. A second meeting of the trustees was convened on 22nd March 2016 to further the operationalisation of the Trust.

The General Fund

The general fund as reflected in the statement of financial position has been split into two categories namely: Fence Maintenance Reserve and Fence Construction Reserve. Twenty percent of each year's Rhino Charge donation is allocated specifically for maintenance of fence already constructed. This ensures that the huge amount of effort and money put into the conservation programme does not collapse from lack of maintenance. The maintenance reserve is therefore to earmark these funds for

maintenance and not used for construction.

The fence construction reserve deficit has increased from KES 61 million to KES 84 million. This situation is expected to reverse during the current year. The fence maintenance reserve surplus increased during the year from KES 120 million to KES 136 million.

Bongo Surveillance Programme (BSP) successes

The Bongo programme continues apace, thanks to a dedicated band of conservation individuals who constantly seek out fund support from a variety of donors. GBP 3,301.20 and US\$ 23,000 was received during the year from Calgary Zoological Society and Kelley Grant respectively towards the BSP. The funds go towards collecting vital information about the Bongo, patrols, removal of snares and spear traps, as well as to the dynamic Bongo wildlife schools outreach programmes under BSP.

Other initiatives

We have continued to provide additional management support to our partners, KFS and KWS and Mount Kenya Trust, by arranging aerial surveillance of the forests of Mt. Kenya and the Aberdares to identify illegal activities within these two mountains.

Together with the County Government of Nyeri, KWS, Space for Giants and Mount Kenya Trust, we are exploring the feasibility of securing a wildlife corridor between Mt. Kenya and Aberdares. The elephant corridor has been identified and interviews with the landowners in the corridor are well underway. So far the responses are very positive.

Over the last two years, Rhino Ark has been advising the Netherlands-based IDH Sustainable Trade Initiative in the formulation and early implementation of their project "Initiative for Sustainable Landscape (ISLA)" aiming at conserving South Western Mau Forest Reserve and bringing sustainability in the broader South Western Mau landscape.

Dr. Thomas Butynski and Dr. Yvonne de Jong, two Rhino Ark's consultants, conducted the feasibility study of establishing a physical barrier along the north-eastern boundary of South Western Mau Forest Reserve. The purpose of such a physical barrier would be to protect forest-adjacent communities from marauding wildlife that are a threat to their life and livelihoods. The barrier would also help address illegal forest resource extraction by controlling the access to the forest through a number of gates.

Rhino Ark in partnership with ChallengeAid, a UK based Charitable Trust, has successfully established two community libraries dubbed 'School of Hope (SOH)' at Bondeni and Njogu-ini primary schools. The concept of SOH is to provide a facility where learners can converge after the normal school hours to do private studies and do homework/school assignments.

Thousands to thank

Rhino Ark has an enormous following both in Kenya and now greatly developed overseas as well. Much of the fund raised focuses upon the annual Rhino Charge where individual car entrants make substantial pledges and raise even more than their pledge each year. It is a grass roots conservation thrust within Kenyan society that has now developed a deep foundation. Every donor knows that Rhino Ark's ventures are to secure the nation's precious 'water towers' and to work in partnership with the government to ensure good governance for maximum benefits. The 2011 Environmental Assessment triggered by Rhino Ark and with support from UNEP and the East African Wildlife Society's Kenya Forests Working Group (KFWG) has placed a value on the Aberdares alone at KES 59 billion annually in good/services (water being the most important) and in biodiversity benefits.

It is always difficult to single out thanks in a report like this. Rhino Ark Charitable Trust has thousands of donors in Kenya and friends overseas who support our home grown and home driven conservation initiative.

I thank all of you for your generous support.

I wish to especially thank the Rhino Charge Committee and the huge band of volunteers who yearly give so much time, thought, ideas and energy to running this unique event.

Michael Karanja - Chairman, Board of Trustees

HIGHLIGHTS FROM THE MOUNTAINS MAU EBURU ECOSYSTEM

EBURU FOREST MANAGEMENT PLAN REVIEW KICKS OFF

Stakeholders at the 30 June 2016 workshop

Under the provisions of the Forest Act (2005), Participatory Forest Management Plans (PFMPs) are developed to guide the conservation of forest reserves and the use of forest resources by local communities. The previous 5-year management plan for Eburu Forest Reserve lapsed in 2013, but various challenges facing Kenya Forest Service (KFS) and the Eburu Community Forest Association (CFA) had derailed previous attempts to review the plan. Following consultations, Rhino Ark undertook to spearhead a re-boot of the management plan review process in collaboration with KFS and the Eburu CFA. This process was kicked off by a key stakeholders' meeting on 30 June 2016 at a one-day workshop in Naivasha. The meeting, convened by the Kenya Forest Service, brought together representatives of local communities and Eburu forest neighbours, administration, law enforcement, government agencies and NGOs.

The workshop acknowledged that new developments such as the completion of the Eburu electric fence had impacted positively on the conservation of the forest by significantly reducing illegal activities while resolving human/wildlife conflict issues. During this session, Philip Ireri, KFS head of ecotourism, pointed out the forest's untapped ecotourism potential. He also observed that the KFS strategic plan of 2014-2017 envisaged the establishment of a bongo antelope sanctuary within the forest. The stakeholders' forum has established a review committee, of which Rhino Ark is a key member, to deliver a draft of the updated 2017-2022 management plan. The updated plan will take stock of the role and impact of ongoing conservation interventions and provide a platform for enhanced forest governance and resource mobilization.

Rhino Ark is providing technical input as a member of the review committee, as well as logistical and financial support to the ongoing review process.

EBURU RAFIKI GROUP JOINS EFFORT TO REHABILITATE EBURU FOREST

Tree planting teamwork between an Eburu Rafiki member and a local community member

Eburu Rafiki is a group comprising residents of Green Park and other neighbours of Eburu forest. The group was launched in April 2016 with the aim of supporting rehabilitation of the forest and its infrastructure under an agreement with Kenya Forest Service. So far, they have funded the improvement of access to the forest through clearing of a section of the road reserve for the main forest track. They have also undertaken to rehabilitate, initially, up to 7 acres of a heavily degraded forest area on the slopes of Ngobobo Hill, along the eastern boundary of the forest near Crater Gate. The group has planted 1,300 tree seedlings, including 400 planted

by staff of the Great Rift Valley Lodge. Local community members are contracted by the group to provide seedlings and to prepare the replant site, as well as join Eburu Rafiki members in the replanting work.

Rhino Ark is facilitating the work of the group through administration of their donations and providing logistical support for their forest rehabilitation work. Rhino Ark's pioneering conservation work in Eburu Forest is providing a solid framework within which other stakeholders now feel comfortable to invest their own time and resources towards the forest's conservation.

SONGOLOI PRIMARY SCHOOL GETS TREE NURSERY

Songoloi Primary School in Eburu location is the most recent beneficiary of the schools tree nurseries programme. The initiative, which is supported by the MPESA Foundation, has so far established model tree nurseries in Ndabibi and Emmanuel Primary Schools in Ndabibi location. Works at Songoloi Primary are now at an advanced stage with all key structures, including stone seed beds, chain link perimeter fence, 2 x 10,000 litre water tanks, plumbing and shade net cover completed and equipment provided. An update to the nursery design has seen the addition of a covered potting shed area. The nursery is anticipated to commence full operations in October 2016.

Inspecting nursery equipment

EBURU BIRDS POSTER & BROCHURE KIT DEVELOPED

Large format poster

Following a bird mapping survey of Eburu Forest earlier this year, Rhino Ark and the Kenya Bird Map Project have collaborated to develop a poster and brochure kit that showcases the birds of Eburu. The brochure presents a comprehensive checklist of 188 species of birds that are found in Eburu Forest and its adjacent areas (including 96 birds mapped within the boundaries of the Forest Reserve), and provides tips on the conservation of birds. The large format poster promotes Eburu Forest as a destination for birding and showcases an iconic species found in the forest. The kit will help to expand public knowledge about Eburu's biodiversity.

ADDRESSING THE FUTURE OF THE OGIEK

Eburu Ogiek community at meeting

On 29th August 2016, Mr. Joseph Towett, Chairman of the Ogiek Council of Elders, convened a meeting of the Ogiek from Eburu to discuss issues affecting them. 85 members of the community attended the meeting. The Ogiek, traditionally a forest dwelling community, has strong attachments to forest. They still depend on the forest resources for a number of their livelihood activities, in particular bee-keeping, and Rhino Ark has supported bioenterprise training for some of their members. To date, one Ogiek family is still residing inside Eburu Forest. A member of that family was part of the Rhino Ark Eburu Electric fence build team and now works as a member of the fence maintenance team.

Over the past few years, the Ogiek have been working very closely with KFS and Rhino Ark towards the rehabilitation of Eburu Forest.

DEEP VALLEY NATURE TRAIL MAPPED

Deep Valley waterfall

As part of the ongoing initiative to document the forest's features and attractions, Rhino Ark carried out a review of the Deep Valley (Ndabibi River) Nature Trail in July 2016.

The trail is arguably the most dramatic of Eburu forest's trails. Beginning at the central forest glade campsite deep in the heart of the forest, the trail is a 2.3km long descent into the precipitous Ndabibi River Valley. The trail drops into the river on the valley floor, and 300 metres further upstream, reveals the main attraction: a nearly 30-foot high waterfall found at the point where the ever narrowing vertical valley walls finally come together. The hike to the waterfall and back is a challenging but rewarding 4.6km long adventure that provides an opportunity to experience the natural forest, view diverse bird species and enjoy one of the forest's hidden treasures

AREA CHIEFS JOIN FENCE MONITORING TEAM

Ndabibi location Chief addresses community baraza

The 43.3km long Eburu electric fence is a critical tool for conservation of the Eburu Forest Reserve. Occasionally, some individuals within the adjacent local communities interfere with the fence in order to gain illegal access to the forest. Such interference can take the form of vandalism or causing temporary short circuits of the fence.

Towards addressing the challenge of fence vandalism, area Chiefs from each location have now been incorporated into the fence technical committee (FTC) meetings, starting in July 2016. By participating in the meetings and inspecting the fence, the Chiefs are able to gain a first-hand understanding of the issues. As part of the local security apparatus, the Chiefs provide a critical link with local communities, and are the focal point for necessary follow up of issues. The Chiefs are also assisting the FTC team by convening barazas (public meetings) through which the communities can be sensitized about the fence.

EBURU-LAKE NAIVASHA WILDLIFE CORRIDOR UPDATE

Buffalo herd at night in the wildlife corridor

Male bushbuck antelope in the wildlife corridor

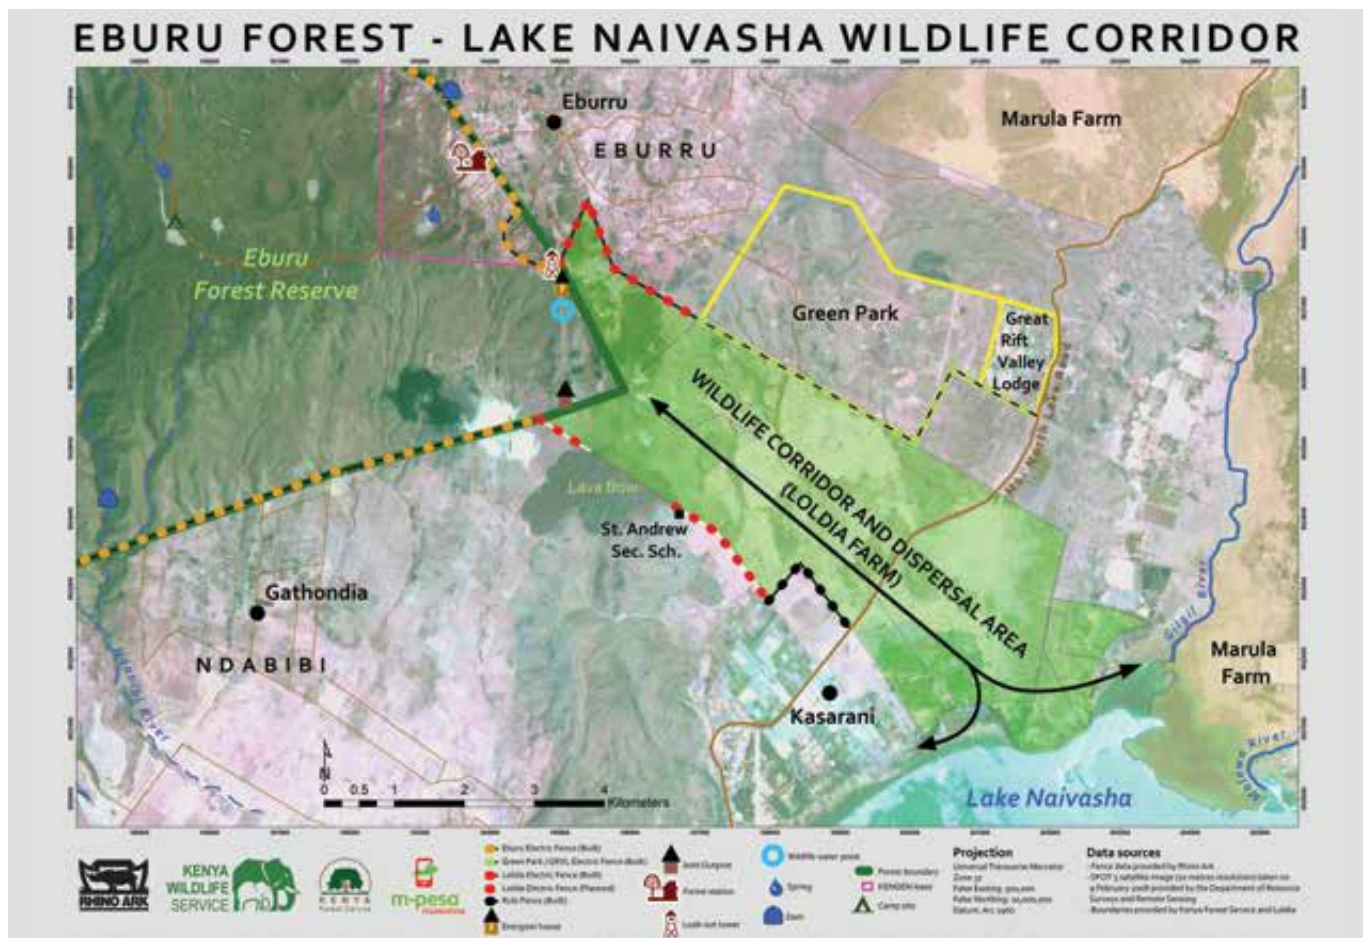

Trap camera pictures courtesy of Alistair Nicklin

The Eburu Forest – Lake Naivasha connectivity initiative continues to work towards securing the wildlife corridor between the forest and Lake Naivasha. Following completion of the 3.57 km long eastern boundary electric fence in February 2016, a fence maintenance system has been established, with dedicated personnel deployed by the Loldia Farm to maintain the fence. Since April, trap camera monitoring of the main Eburu Forest boundary fence wildlife is providing hard evidence of wildlife movement into the corridor.

In June, the western boundary of the corridor was surveyed to assist in planning for construction of an electrified fence along the boundary. This survey involved a detailed ground inspection of the entire western boundary, taking into account topography, to plan fencing work. The landscape that lies to the south of the main Eburu Forest Reserve boundary towards the Kasarani and Ndabibi area is dotted with impressive volcanic features. Among them is a hill, through which the Loldia boundary passes. This volcanic hill features deep crevasses and jagged rocks, atop which stunted leleshwa trees grow. It forms a natural barrier to wildlife, and even human movement, and it was determined that the fencing plan would take advantage of this.

In August 2016 the committee took steps to enhance monitoring of wildlife within the corridor and adjacent areas by incorporating a wildlife research scientist from Kenya Wildlife Service into the team. Also in August, stakeholders met with officials of the Kenya Rural Roads Authority (KeRRA) to discuss the issue of providing a wildlife overpass along the Moi North Lake Road, which is currently being upgraded to tarmac. Through this constructive engagement, KeRRA accepted to revise the road design at the site of the wildlife crossing. The revised design, which was lowered to provide a clearance of 5.5 metres, allows for the possibility of construction of an overpass, subject to funding. This provides a window of opportunity for stakeholders to collaborate towards ensuring this solution is put in place.

In early October 2016 a preliminary survey of the boundary of adjacent farms in the North Lake area, including Bilashaka, Rocco, Ol Suswa and Korongo was carried out to assess the wildlife movement routes. This survey has provided a roadmap for more detailed study and potential interventions

MT. KENYA ECOSYSTEM

GOOD PROGRESS ACHIEVED IN THE BUILDING OF THE IMENTI ELECTRIC FENCE

A section of the completed fence in Imenti

Rhino Ark, together with its partners KWS and KFS, have completed 25 kilometres of the Imenti Electric Fence (Mt. Kenya ecosystem). The fence construction is also supported by the forest-adjacent communities from Buuri and North Imenti constituencies who have already contributed a total of KES 6 million.

The Imenti area has recently been a major hotspot of human-wildlife conflicts causing the death of nine community members and the loss of nine elephants since January 2014. Human-wildlife conflicts in the area are the result of vandalism and poor maintenance of a 20 kilometres four-strand fence built in 1997.

In order to address the situation by building a comprehensive electric fence, Rhino Ark and KWS deployed a fence build team to the Imenti area in March this year.

NEW FENCE MAINTENANCE MONITORING AND REPORTING SYSTEM SET UP FOR MT. KENYA

Rhino Ark, together with KWS, has developed a new system for fence maintenance monitoring and reporting on Mt. Kenya. In each phase (approx. 50km) of the electric fence, there is a Fence Supervisor who is overseeing the maintenance work carried out by the Fence Attendants. Equipped with a motorcycle, the Fence Supervisor meets each of the Fence Attendants on site daily. He collects data daily on the voltage of each fence section, and on fence repair and maintenance work carried out by the Fence Attendants.

The data collected is sent to Mt. Kenya National Park & Reserve HQ where it is keyed in a new database developed by Rhino Ark. Rhino Ark Executive Director handed over on 8th September a new laptop with the customized database to KWS Ranger Pamela who is responsible for entering the data.

The database will generate automated reports that will highlight fence sections most often affected by low voltage due to human-induced or natural causes. It will also highlight energizer stations most affected by low voltage. The database will also help monitor the clearing of the vegetation in the fence buffer zone by each Fence Attendant.

KWS RANGERS TRAINED ON PROSECUTION OF WILDLIFE CRIMES

Participants who attended the training

KWS and Rhino Ark organized a two-day training in the prosecution of wildlife crime for 20 KWS rangers involved in law enforcement on Mt. Kenya on 28-29th October 2016. The training focused on management of scene of crime, handling of exhibits, drafting of witness statements, and appearance in court. The training was conducted by two senior magistrates, Florence Macharia and Thomas Muraguri.

The training was designed based on a review of successes and failures in the prosecution of wildlife crimes on Mt. Kenya. It also included a moot court during which the rangers participated as witnesses in a suit related to illegal possession of wildlife trophy.

Similar trainings will be organized quarterly.

A big thanks to Florence and Thomas for conducting the training on a voluntary basis.

Christian Lambrechts, Executive Director, Rhino Ark hands over a new laptop to Pamela, Ranger, KWS for data entry on 8th September 2016

SECOND SECTION OF THE IMENTI ELECTRIC FENCE LAUNCHED

Rhino Ark, together with its partners Kenya Wildlife Service, Kenya Forest Service and the local communities, started the construction of a second section of 20 km long fence in the Upper Imenti Forest. The fence is part of the 450 km long Mt. Kenya Electric Fence currently under construction.

The fence build team was welcomed by Hon. Boniface Ginoti Gatobu, Member of Parliament for Buuri Constituency, KWS Senior Warden/Mt. Kenya National Park & Reserve, KWS Assistant Ecosystem Conservator for Meru County, Rhino Ark Executive Director, local leaders and many community members on 29th July 2016.

KES 3 million from the Buuri Constituency Development Fund was contributed towards the fence, which is financed under a public/private partnership between Rhino Ark, Kenya Wildlife Service and the Treasury.

This section will complement the first section of 20 km completed along the southern boundary of the Imenti Forest in North Imenti Constituency, the construction of which started in early March this year.

The area has recently been a major hotspot of human-wildlife conflicts causing the death of community members and the loss of elephants.

ELEPHANT MOVEMENT IN IMENTI AREA ASSESSED

Participants in the meeting to discuss elephant movement

Rhino Ark, together with KWS, KFS, Save the Elephants, Mount Kenya Trust, Lewa Conservancy, Northern Rangelands Trust, Marwell Wildlife and Wildlife Conservation Society, met at Lewa Conservancy

to discuss elephant movement in and around the Imenti Forest (Mt. Kenya) on 30th September 2016.

The specific purposes of the meeting were to,

- (i) assess the land use in the corridor used by elephant between the Upper Imenti (near Ruiri) and Chaba;
- (ii) identify current or potential future bottlenecks in the Muchene forest corridor linking Mt. Kenya and Upper Imenti; and,
- (iii) assess whether current forestry activities may hinder elephant movements across the two passages over the Gathika River.

An aerial recce of the Imenti area was organized as part of the meeting.

The meeting endorsed the proposed strategy for fencing the Imenti Forest and recommended that an elephant gate be built in the Upper Imenti for elephants coming in from Chaba. The meeting also identified key interventions to address potential interference with elephant movements across Gathika River and in the forest corridor linking Mt. Kenya and the Imenti Forest.

A big thank you to Lewa Conservancy for hosting the meeting.

ABERDARES ECOSYSTEM

AERIAL SURVEILLANCE OF THE WESTERN SLOPES OF THE ABERDARES CONDUCTED

The aerial surveillance team

Rhino Ark facilitated a surveillance flight of the western slopes of the Aberdare ecosystem on 14 July. In the flight were the KWS Senior Warden/ Aberdare National Park, KWS Deputy Park Warden, KFS Assistant Head of Conservancy, KFS Regional Commander, KFS Assistant Ecosystem Conservator, Nyandarua County, KWS Warden/Northern Aberdare, Rhino Ark Executive Director and Rhino Ark Fence and Community Manager.

Despite the bad weather conditions, the team was able to detect a number of illegal activities. The flight was followed by a debriefing session during which the situation and the issues affecting the western slopes of the Aberdare were discussed at length, and joint interventions agreed upon.

2016 ABERDARE FENCE RELAY RUN A SUCCESS

The 7th annual Aberdare Fence Relay Run was flagged off on 6th July 2016, by Mr. Joseph M. Wachiuri, Chairman, Nyeri Water and Sewerage Company Ltd (NYEWASCO) at a colourful ceremony held at Treetops Lodge in the Aberdare National Park.

The Aberdare fence Relay Run was conceived in anticipation of the completion of the 400km Aberdare Electric Fence. The purpose of the run is to have all the schools that neighbor the Aberdare Fence take part in a relay race around the Aberdare ecosystem. The schools, each in turn receive the Run Baton and run several kilometers along a section of the Aberdare fence line, up the hills and down the valleys and along dusty rural roads near the fence to hand over the baton to the next participating school.

Speaking during the flag off, Mr. Joseph M. Wachiuri said that, "NYEWASCO recognizes the importance of the Aberdare Ecosystem as a water tower and has now prioritized conservation activities within the organization. I am glad that NYEWASCO has now established a relationship with the three key conservation partners, KWS, KFS and Rhino Ark. We aim to work closely with them in the near future."

The Relay Run was completed on 22nd August 2016. The relay baton was received by Mrs. Margaret Gachagua, the First Lady of the County of Nyeri, during a fun-filled event at Bondeni in the Aberdare National Park. Also Present at the event was the Nyeri County Director of Education, the KWS Assistant Director for the Mountain Conservation Area and the Rhino Ark Fence and Community Manager.

600 children and 120 teachers from 60 schools participated in this year's Run around the 400 km fenced Aberdare ecosystem. These schools were selected among 97 schools located in based on a conservation essay competition. In this year's essay competition, the pupils were to write on the importance of the Aberdare ecosystem.

The Run aims at raising awareness among the youth living around the Aberdare ecosystem of the importance of conserving this critical water tower, which provides among others, most of the drinking water for Nairobi and the urban centers located around the Aberdare ecosystem. The Run also provides an opportunity to appreciate the benefits derived from the electric fence which has reduced tremendously human wildlife conflict around the Aberdare and assisted in curbing illegal activities in the forest.

SOUTH WESTERN MAU ECOSYSTEM

4TH SURVEILLANCE FLIGHT ABOVE SOUTH WESTERN MAU FOREST SHOWS MAJOR IMPROVEMENT

The aerial surveillance team

As part of the South Western Mau landscape conservation project funded by the Dutch-based Sustainable Trade Initiative (IDH), Rhino Ark is coordinating quarterly surveillance flights above the 60,000 hectares of South Western Mau Forest Reserve and parts of Western Mau Forest Reserve. The 4th flight was conducted on 13th September 2016.

Participants in the flight included the KFS Ecosystem Conservator for Kericho County, KWS Warden for Bomet and Kericho counties, WRMA

Water Conservation Officer, KFS Forest Manager of Itare Station, Rhino Ark Executive Director and Rhino Ark Fence and Community Manager.

A Magistrate from the Molo Low Court where most cases of illegal exploitation of the forest are dealt with, also participated in the flight to appraise herself of the impact of illegal exploitation on the forest and the difficulties to arrest a culprit deep inside the forest and to bring him/her to court.

The purpose of the flight was to detect illegal activities in the forest and assess the impact of law enforcement operations conducted. 27 operations have been mounted by KFS and KWS over the past six months. These operations led to the arrest of 22 people involved in the making of charcoal, the confiscation of seven pieces of ivory, the destruction of 157 charcoal kilns and the impoundment of over 200 donkeys.

The flight revealed a significant reduction in illegal activities in the forest, in particular charcoal making.

The flight was made possible thanks to Finlays providing the aircraft and IDH's financial support.

FOREST ELEPHANT CENSUS/FOREST HEALTH SURVEY OF THE MAU FORESTS COMPLEX UNDERWAY

32 rangers and scouts were trained by Hilde VanLeeuwe from the Wildlife Conservation Society (WCS) to undertake the most intensive forest elephant census & forest health survey ever undertaken of the Mau Forests Complex.

The rangers and scouts were seconded by KWS and KFS (22), Rhino Ark (5) and Bongo Surveillance Programme (5). They were organized in eight teams of four persons. They surveyed 336 transects of 250 meters. The exercise that started on 15th September was completed on 20th October 2016.

The exercise is partnership between WWF, WCS, KWS, Rhino Ark and the Bongo Surveillance Programme. It is primarily funded by WWF and WCS with in kind and cash support from the other partners.

A similar census and survey was undertaken on Mt. Kenya in February. The Aberdare will be covered next January. These censuses/surveys will be repeated every three years to monitor (i) the elephant (and other key threatened species) population in these

The rangers and scouts who received the training

montane ecosystems and (ii) the health of the forest. This will enable keeping under review the impacts of conservation efforts in these protected areas.

Rhino Ark is also providing equipment and a vehicle in support to the census/survey, the outcome of which will help monitor the impact of Rhino Ark-supported conservation interventions in the Mau.

AERIAL RECONNAISSANCE OF THE UPPER CATCHMENTS OF SONDU AND MARA RIVERS CONDUCTED

Rhino Ark led a high-level team above the upper catchments of Sondu and Mara rivers on 16th June 2016. The team included the Principal Secretary of the Ministry of Water, the Governor of the County of Kericho, senior officials from the Ministry of Water, Water Resources Management Authority, GIZ and the Netherlands-based Sustainable Trade Initiative's (IDH) Initiative for Sustainable Landscape (ISLA).

The flight was coordinated by IDH/ISLA, as part of their initiative to

provide sustainability in the South Western Mau landscape. Rhino Ark is a technical adviser and a partner in that initiative.

The purpose of the flight was to appraise the team of the issues affecting the upper catchments of Sondu and Mara rivers, including South Western Mau Forest Reserve and Transmara Forest Reserve. It will help in the design of interventions to be implemented in the landscape.

FEEDBACK AND TESTIMONIALS

Wainaina Kiringa, farmer, Ndabibi Location, Mau Eburu.

"I have lived in the area for over 35 years, since childhood. I farm maize, beans and potatoes, and also keep livestock. The main wildlife problem in this area is bush pig, but we have also had problems with porcupine, and minor problems with monkeys.

Before the fence was built bush pigs would invade my farm and destroy my crop harvest. Each acre can produce up to 40 bags of maize, but I would only salvage between 10 to 15 bags an acre at most – a terrible loss. Now with the fence in place I get the full yield from my farm."

Patrick Njagi, Chuka Forest Station, Mt. Kenya.

"It all happened in a blur. Just when my dad asked me to pass on the torch to illuminate the jumbo that had invaded our shamba, I saw my father tossed in the air by another elephant which we had not spotted. I ran o to call for help but when I turned back, my father, Apiel Njoka Njeru, lay critically injured on the ground and the two elephants which trampled on him had retreated back into the darkness. The death of my dad on January 17, 1990, which left me tending for a family of eight because my mother had passed on 16 years ago."

Beaming with joy, Mr. Njagi said, "it is now a different story thanks to Electric Fence build by Rhino Ark and its partners. I sleep soundly because after decades of agony, elephants no longer roam in my village in Chuka, right next to the Mt Kenya forest."

Mr. Elijah Marete, Ribui Village, Mt. Kenya.

"Living next to Upper Imenti forest is a nightmare. Elephants destroy my crops such as banana trees, avocado trees, sugar cane, maize crops. In June 2016, my neighbor, was seriously wounded by an elephant that had strayed out of the forest. Using its tusk, the elephant pierced his hip-joint and it's by sheer luck that my neighbor survived. To deter elephants from raiding our farms we use fire missiles, make noise and beat drums. Around my compound, I illuminate the area with flood lights the whole night. I incur very high electricity bills. We are eagerly waiting for the electric fence construction to get to our village and we have organized ourselves to provide free manual labour... [The fence] is our project and therefore we shall report to KWS and KFS any person trying to go through the fence. If our farms are secure, we are even willing to forfeit firewood collection and livestock grazing in the forest."
